The Mossy Branch BESS can store excess renewable energy (e.g., solar power) during low-demand periods and release it during high-demand times, enhancing the grid's efficiency and

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.

Georgia Power will soon flip a switch and turn on its latest clean energy construction project: battery storage. When millions of Georgians begin

ADB grants \$104 million loan to Georgia for its first energy storage facility, paving the way for green hydrogen and grid independence.

In a recent guest blog for Energy-Storage.news, Allan Oduor, of Enertis Applus+, highlighted that present and projected load growth is among the

The first storage batteries will be installed near the Ksani-500 power plant, integrating into the national grid. The system will feature a capacity of 200 MW and 200 MWh. The storage system is expected to

Power Edison's engineered solutions incorporate best of breed batteries, inverters, switchgear, safety equipment, mobile transportation

The State of Georgia is positioned to become a leader in battery energy storage in the Southeast with Georgia Power's planned investment to own and operate 80 megawatts (MW) of

Georgia Power announced today that it has started construction on a new 200-megawatt (MW) battery energy storage system (BESS) in Twiggs County, southeast of Macon, Ga.

Georgia Power has issued a request for proposals (RFP) to develop 500 MW of new battery energy storage

Georgia Mobile Energy Storage Battery

projects, with systems required to provide at least two hours of discharge
