This Commission department is responsible for the EU's energy policy: secure, sustainable, and competitively priced energy for Europe.

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and increase the possibilities

A range of solar technologies are available to harness the sun's energy in different ways. Solar photovoltaic (PV) panels, comprised of individual solar cells, convert sunlight into electricity.

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is weakening

In 2024, the EU output of photovoltaic electricity accounted for 11% of the EU's gross electricity output, according to Ember. Continued growth in the solar energy sector is expected in the

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the sun's

This web-based report marks the 3-year anniversary of the REPowerEU Plan and takes stock of the progress made since its adoption.

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The targets have evolved consistently since first established to help the EU reach its ambitious energy and

Photovoltaic panel installation tutorial 500 watts

climate goals.
